Manuscript Eq. (62): raw HAP--UAV transmittance PDF
wide integral f_X=1.000000000
p_out=0.250000; q_0.999=0.0392779
MC X (conditional density)
MC positive T_{raw} (mass p_{in})
Analytical $f_X(t)$
Analytical $p_{in} f_X(t)$
reference $A_0 \eta_{atm}$
outage mass $P(T_{raw} = 0) = p_{out}$
Continuous probability density
Discrete probability mass
Raw power transmittance $t = T_{raw}$
