2. Conditional numerical crossings - finite catalog; no continuous global optimization
Centered 2 km square: 251 exact radial groups
Extended distances shown separately as markers
Diagnostic crossing (dB)
Additional attenuation margin (dB)
Zenith angle (deg)
Zenith angle (deg)
Fixed clear-sky optimum
Reselected: finite 212-source catalog
x at 0: already nonpositive at clear sky
These markers are NOT roots at A=0
